

HOW TO COMPLETE YOUR RECIPIENT DAM INFORMATION FORMS

Date: 01-JAN-04

INTERNATIONAL BEEF RECORDING SCHEME
 EMBRYO TRANSFERS CALVES
 RECIPIENT DAM INFORMATION FORM

Page: 1

Herd: _____
 Name: _____
 Addr: _____

1. Calf Details :

The genetic dam, sire, date of birth and sex are pre-printed for each calf as an easy reference to the details already recorded for that calf. If any of these details are INCORRECT, please provide the CORRECT details.

2. Calf :-

The Breed Society/Association ident of the calf is listed.

3. Ident :

The ident of the recipient dam should be entered in this column, if possible. At a minimum, it is recommended the tag or tattoo of the dam is specified. This is particularly important where the recipients have previously been recorded with the Breed Society/Association and/or where recipients have been used for more than one year.

4. DOB / Yr:

Information regarding the age of the recipient dam should be entered in this column. If a date of birth is not known, an approximate calving year should be specified. This is particularly important where mixed age recipients are used in an ET program.

5. Breed :

The breed of the recipient dam should be entered in this column. Please note,
 - a specific breed of recipient is required (eg. Brahman/Angus) rather than a generic breed (eg. Brahman cross).
 - a list of breed codes has been attached to assist you when completing this column.

RETURN TO: BREEDPLAN
 A.B.R.I.,
 University of New England,
 ARMIDALE N.S.W. 2351

NOTE: Please provide estimated Year of Birth if Date of Birth is unknown and Ident is provided.

Date: ___/___/___
